SMART & MODULAR VERNIPONICS

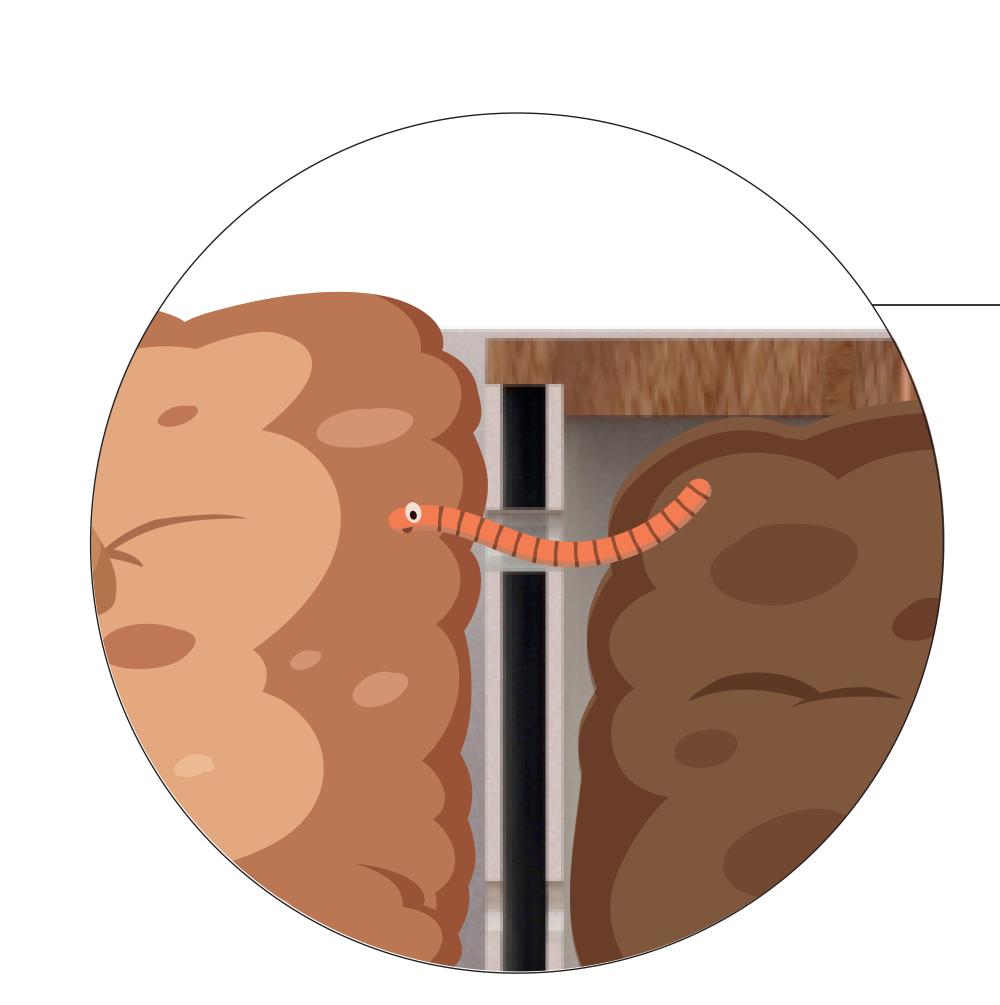

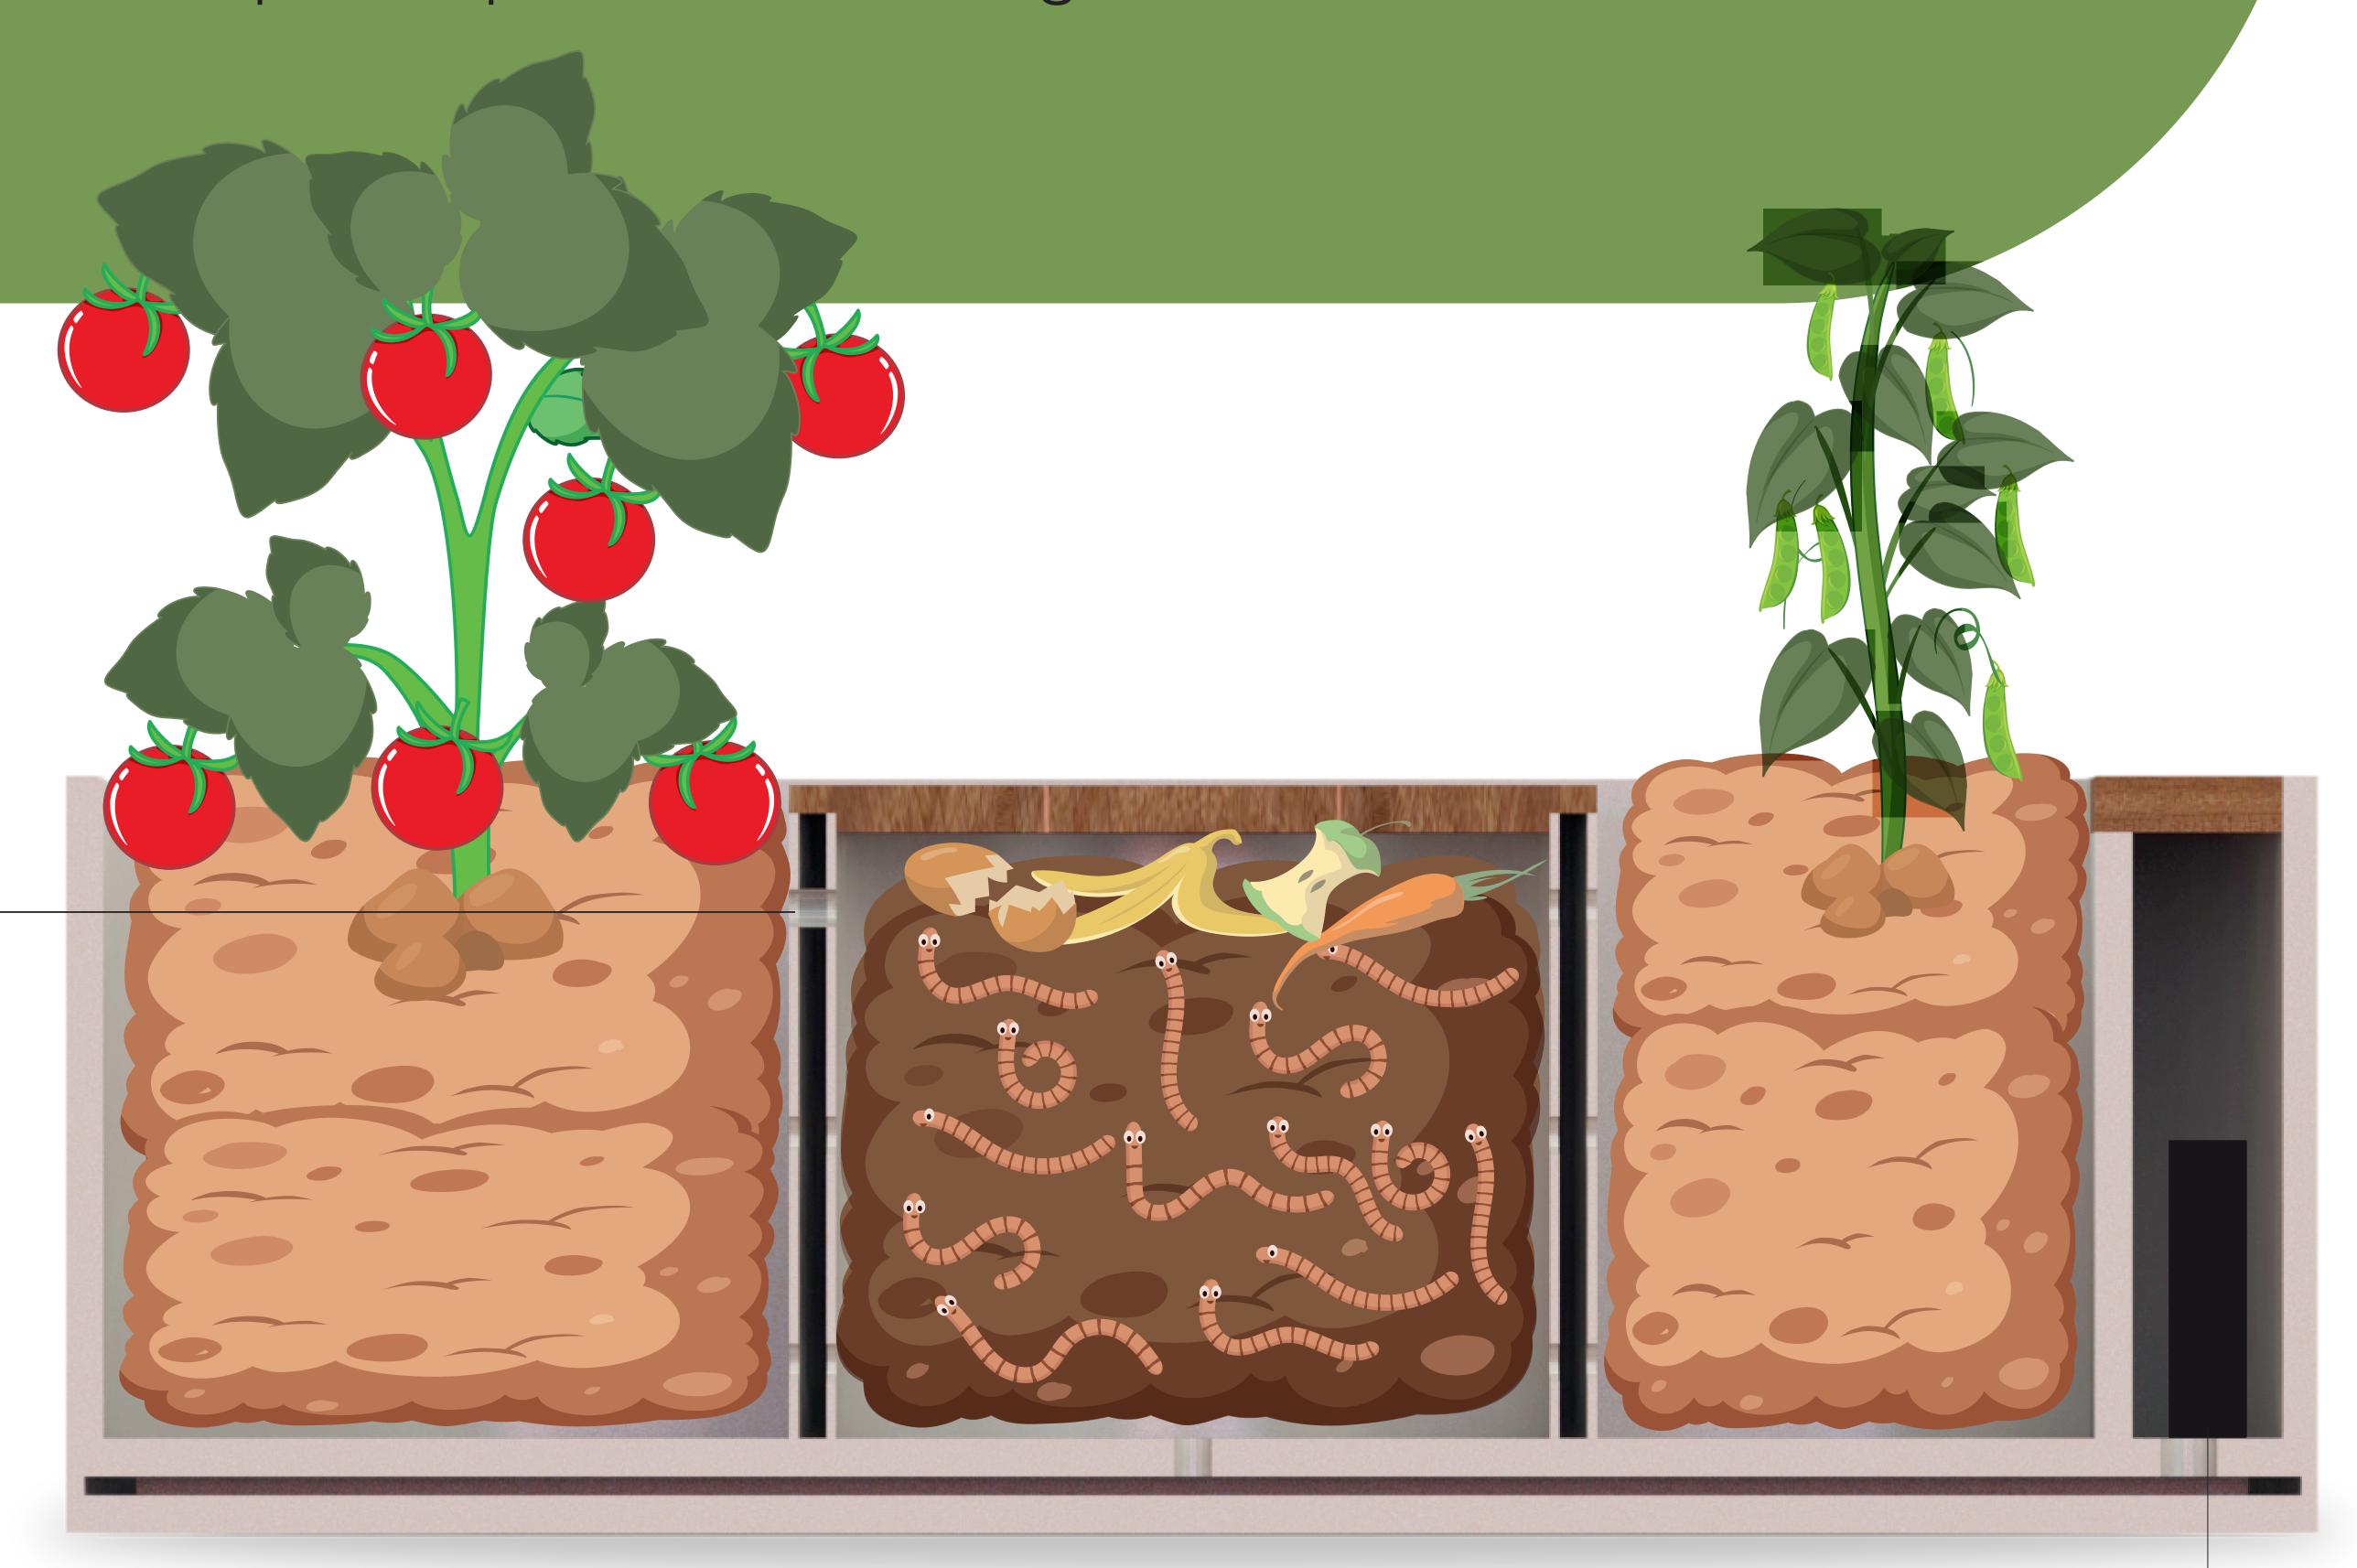

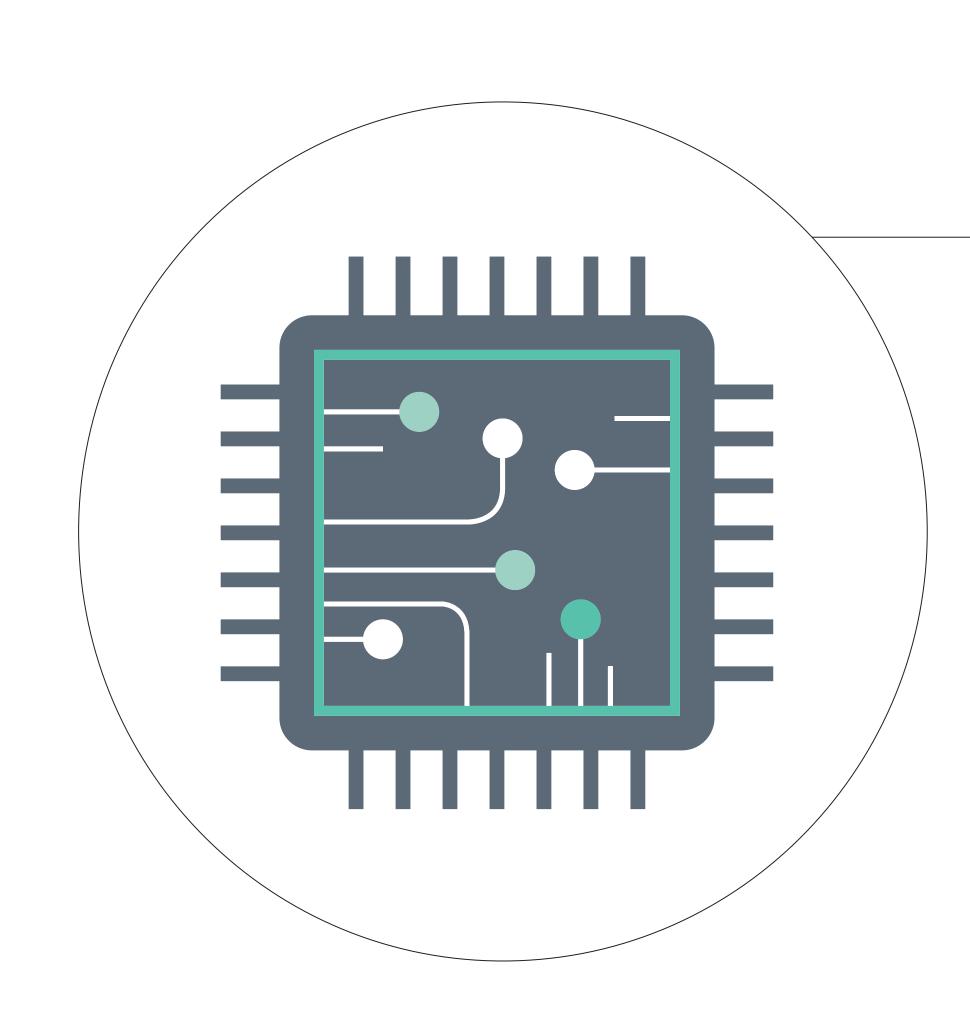

What is Wormify?

Wormify is a smart and modular vermiponics system, specifically designed for city rooftops of apartment buildings.

How does Wormify work?

Wormify is based on a modular easily movable Keyhole Garden, taking advantage of Vermicomposting to assist in fertilizing the plants. Furthermore, he system has an application that gives you utile information about soil and worms.

Sustainable solution

Vermicomposting helps rebuilding the soil with rich nutrients which leads to a garden that grows fresh and healthy food.
